# LIFE INSURANCE.

## PENN MUTUAL LIFE INSURANCE COMPANY,

### Office No. 91 Walnut Street.

## CAPITAL $50,000.

This Company is now ready to make INSURANCES ON LIVES, on the Mutual System, without liability beyond the amount of Premium.

(☞ *All the Profits of the Company divided annually among the Insured.* ☜)

The Premium may be paid quarterly, semi-annually, or annually, or one-half of the premium may be paid in a note at twelve months.

Individuals insured in this company become members of the corporation, and vote for trustees.

For the greater security of parties insuring with this Company, a guarantee capital of $50,000 has been created, to meet the losses that may accrue upon policies issued by the Company, to be held and used by the Trustees, until a capital exceeding that amount has been realized from the receipts of premiums.

In this company, SHORT POLICIES, or those for one and seven years, PARTICIPATE EQUALLY with the life policies, in the whole of the profits. In other life insurance companies, a portion of the profit is divided only amongst the life policies—the one and seven year insurers get nothing, a very unfair arrangement, as the short policies are the most profitable. Blank applications for Insurance, with full particulars, can be had at the office.

## PECULIARITIES.

The advantages held out by "The Equitable," will be found most favourable to the assured, and such as are afforded by no other Life Insurance Company in the United States.

The premiums are lower, and the conditions in the policy are less onerous to the assured, than in other offices. The travelling leave is most extensive and liberal.

The age of the assured is admitted on the policy, which can only be vitiated by fraud.

The Company are satisfied if the party assuring the life of another had, at the time of affecting the assurance, a *bona fide* interest in the life.

The policy is assignable *without* the consent of the Company.

If the party assured die in a duel, by his own hand, or under sentence of the law, such death will not invalidate the policy, except so far as it was the property of the deceased at the time of his decease.

By the Half-credit rates of Premiums, a creditor may assure the life of his debtor without paying more than is actually necessary to cover the risk.

Persons insured for life can, at the *commencement*, *borrow* half the amount of annual premium, and claim the same privilege for *five* successive years without security or deferred note.

Married women and female children can insure the life of either a husband or parent free from the claims of creditors.

The Company not being "Mutual," the affairs of the assured are transacted without the interference of the numerous persons who, in Mutual offices, have a right to search the books.

*Rates for Insuring* $100 *on a Single Life.*

| Age. | For 1 year. | For 7 years. | For Life. |
|---|---|---|---|
| 20 | 81 | 91 | 1.00 |
| 30 | 99 | 1.30 | 2.04 |
| 40 | 1.29 | 1.64 | 2.70 |
| 50 | 1.86 | 2.07 | 3.94 |
| 59 | 3.48 | 3.97 | 6.05 |

*Example.*—A person aged 30 years next birth-day, by paying the company 99 cents, would secure to his family or heirs, $100, should he die in one year; or for $9.90 he secures to them $1,000; or for $13 annually for seven years, he secures to them $1,000, should he die in seven years; or for $20.40 paid annually during life, he secures $1,000 to be paid when he dies. The insurer securing his own bonus, by the difference in amount of premiums from those charged by other offices. For $19.50 the heirs would receive $5,000 should he die in one year.

Forms of application and all particulars may be had at the office.

# HECKERS' PREPARED FARINA.

## AGENCY, 101 SOUTH FRONT ST., PHILADELPHIA.

Hecker & Brother, 201 Cherry street, New York, respectfully inform the Medical Profession, that they have established an Agency and Depot for their Farina, at No. 101 South Front street, Philadelphia, under the superintendence of Mr. F. C. Treadwell, as Agent.

In addition to several analysis of the article by distinguished Chemists of New York, a sample was submitted to the analytical skill of Professor J. C. Booth, of Philadelphia, whose careful manipulations confirm the previous high character of Heckers' Farina, as food for the healthy as well as the sick. No other substance is so well calculated to establish during infancy the foundation of a strong and well developed physical organization.

Liebig, in his Agricultural Chemistry, page 48, (Philadelphia edition,) observes: "Children fed upon arrow-root, salep, or indeed any kind of amylacious food, which does not contain ingredients fitted for the formation of bones and muscles, become fat, and acquire much *embonpoint;* their limbs appear full, but they do not acquire strength, nor are their organs properly developed."

### ANALYSIS BY PROFESSOR BOOTH, OF PHILADELPHIA.

*Laboratory*, 217 *Arch Street, Philadelphia, Nov.* 4, 1848.

Dear Sir:—I have just completed a very thorough analysis of the "Farina" of Hecker & Brother, and find it to contain the following ingredients in 100 parts:

| | | | |
|---|---|---|---|
| Formerly included as Gluten, | Starch, | 69.4 | |
| | Vegetable Fibrin, | 6.4 | |
| | Gliadin, | 3.0 | =11.6 Nitrogenous Principles. |
| | Albumem, (Vegetable) | 2.2 | |
| | Gum, | 2.9 | |
| | Sugar, | 2.4 | |
| | Bran, | 2.1 | |
| | Water, | 9.9 | —98.3 |

The analysis is sufficient to show the excellent qualities of the "Farina" for the purposes for which it is applied, whether as a simple diet for invalids, or an excellent food for the healthy. From its qualities it must supercede others now used for the sick, as well as for making agreeable and nutritious preparations for the table.

I have given it a full trial in my family, both in sickness, and as a table luxury, and cordially commend its use to the public without hesitation.

Respectfully yours,

JAMES C. BOOTH.

Mr. F. C. Treadwell, Agent for Heckers' Farina,
101 South Front Street, Philadelphia.

### PROFESSOR REID'S ANALYSIS.

New York Hospital January 29, 1848.

I have analyzed the Farina made by Hecker & Brother, of this city, and report the following as its constituent parts: ☞

| | |
|---|---|
| Starch, | 64 |
| Gluten, | 13 |
| Albumen, | 2 |
| Gum and Sugar, | 10 |
| Bran, | 2 |
| Water, | 9—100 |

The particular claims of this substance to the notice of the Medical Profession and the public, as an article of food for children and invalids, will rest upon its containing, in the gluten and albumen, vegetable fibrine and other nitrogenized bodies not found in arrow-root or similar substances, and which modern chemistry has pointed out as being necessary to the formation of animal fibre, and by means of which nature makes up for the constant waste that takes place in the human body.

LAWRENCE REED, Professor of Chemistry, &c., to N. Y. Hospital.

### THE NEW YORK ACADEMY OF MEDICINE

Appointed a committee consisting of Drs. Cheeseman, Metcalfe, and Rotton, to examine and report on Heckers' Farina. After a thorough investigation of the subject, the committee made a unanimous report in favor of the great superiority of the Farina over arrow-root, sago, potato starch, tapioca, and other farinacious substances for invalids and children, as well as being a highly nutritive and valuable food for the healthy.

A number of testimonials from physicians of the first respectability, both in Hospital and private practice, in New York, Philadelphia, Boston, Baltimore, and Washington, are in the hands of our Agent; but we have adopted a rigid rule for ourselves and Agents, *never to publish them*—preferring to rely on the merits of the article alone to give and sustain popularity.

HECKER & BROTHER.

Strictly speaking, the Farina is neither stringent nor laxative, but restorative; strengthening the digestive and absorbent vessels, and thereby enabling them to perform their common functions. In disordered bowels, even under the forms of confirmed diarrhœa and dysentery, it is found to be a natural corrective, and by its soothing and healing properties, affords the physician the most desirable assistance. In cases of cholera, when food is admissible, the Farina prepared under the direction of a judicious physician, can scarcely fail to be salutary. As prevention is preferable to cure, the free use of Farina, by persons in health, would tend to preserve that sound condition of the body, which so often enables it to escape from, resist, or overcome disease.

For modes of preparing this delicious article for the table, see the directions on the papers in which the Farina is put up, and the circulars which may be obtained at the Agency.
